

TECHNNOVATION LABS

The *T*rendiest place to learn web *T*echnologies

How DID we **START**

- We are a venture started by a group of industry professionals who are extremely passionate about **technology**
- We started in **Sept** 2012 with the aim of providing world class training in **Web Technology** in Pune.
- Within a year and a half, we have notched up quite a number of students who are working in **great companies**
- We are the first institute in Pune to have focussed training in web technologies.
- The quality of our cross platform training is par excellence in Pune

OUR GOALS

To provide the best quality technological education to all those who have great passion for **Technology**

OUR VALUES

We do a lot of different things but we never compromise our quality.

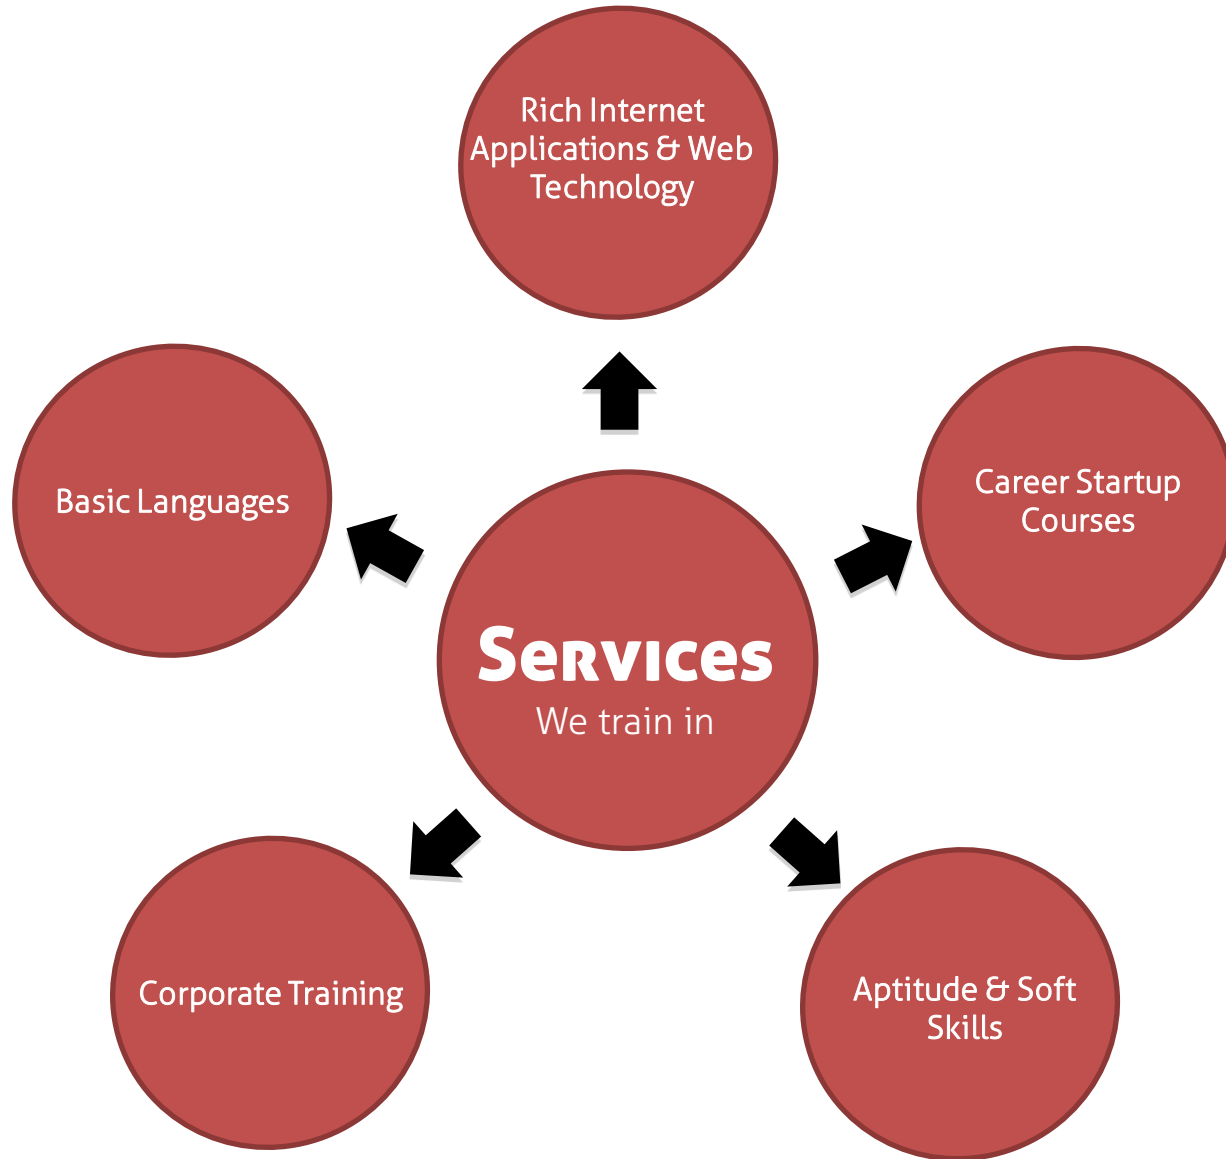

We only do what we are best at.

The value to our students depends upon the people we have.

We make an extra effort to recruit people who have a

passion for teaching and passion for technology

PHP & Web Development

- Hypertext Preprocessor is a server side language used to built dynamic web applications
- Most used and preferred programming and scripting language
